Instruction of safe usage for inflatable toys

1. The product is packed to cylinder form, open the package bag and unfolding the product, joint the blower to the inflating tube tightly.
P.S.: it's better to place a mat on the ground, to avoid the damage from the friction.
2. Open the power switch after you fasten the blower with inflating tube tightly, the products will be inflated automatically as photos. If you find some enwind during inflating, please pull the products smoothly immediately, or it will be damaged for heavy air pressure.
3. Players ask for no shoes, no glasses or no sharp object in pocket.
4. Inflatable climbing should be checked if the top pull buckle is without damage. Climber must tie the safety belt while a worker to look after the climber's safe and assist to pull tightly the climbing rope
5. No use in rainy days, products will be getting dirty if soaked by rain. If soaked, please ask worker to inflate the products to dry it in sunshine.
