

## More Detail of Inflatable Slide

**More Details:**

- 1. the sliding sheet can be removable and the material is 0.45mm shining material.**
- 2. the climbing part, the step is also can be removable, and we will sew the belt along the edge. See the photo**

3. about the bottom, we use black color 0.55mm pvc for it .just like  
this photo shows

4. about the surface of the slide part and the climb par, everywhere  
we will sew the **reinforce strips**, see the photo

**then this will make your sliders more durable. Also looks perfect.**

**5. about the anchor points, we will make it like this , see photo**

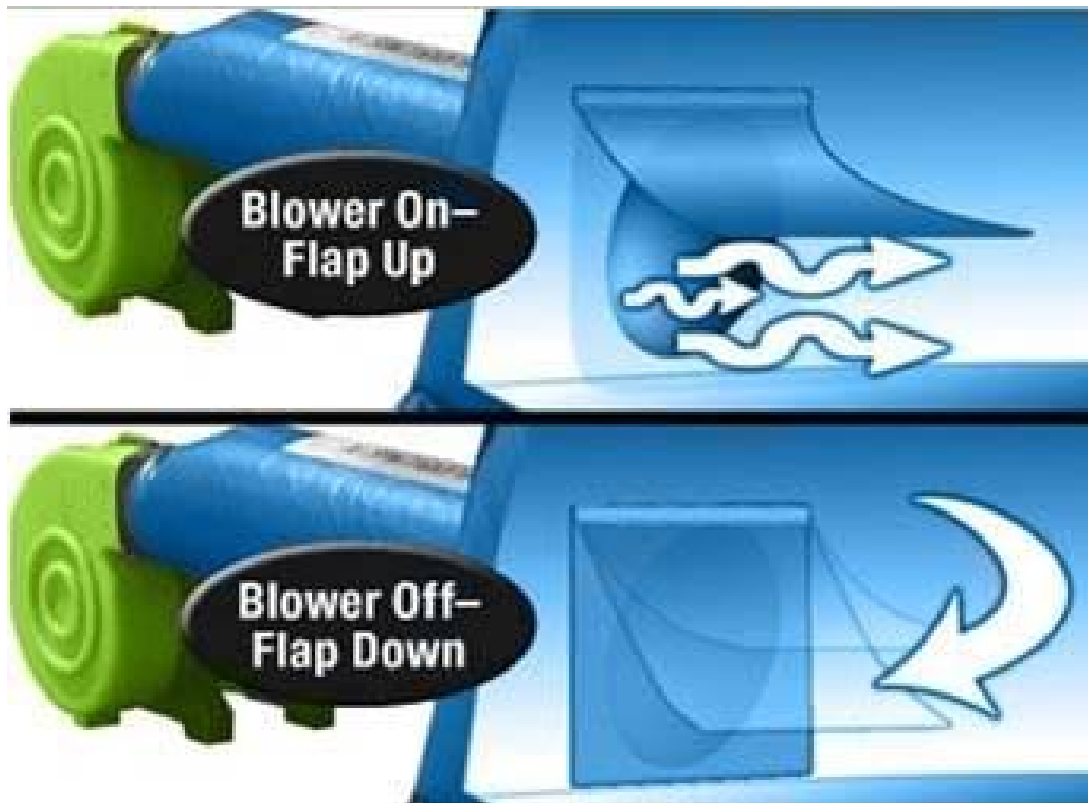

**about the deflation part, we will make it like this,but black color will be ok, and two zips**

**6. about the inflation part, we will make it like this**

**For the safety, we make safe flap inside the air tube, when the electricity is cut off and make the blower off suddenly,the flap will help stop the air let out too quickly. So the kids can have enough time to leave the inflatable. **Note:** the size of the blower tube will be 25cm.**

- 7. about the package, the package bad will be like this and also make black strip and pack the products. See the photo**

- 8. and also make black strip and pack the products. See the photo**

## **9. about repair kit**

**we supply the repair kit bag like the yellow one.**

**There must be the black color pvc inside the bag, other color pvc depends on the units.**

**9.at last, all sliders need a cover for the slide part. And the color is the same as the sliding sheet.**
